* The enforcement Alteration and Restoration figures were reported from WIRe; however, they represent only a portion of the C&E cases. Weekly reporting indicates that MassDEP ordered 19.5 acres of resource area, 727 linear ft. of stream bank, and 74 acres of land under water restored in State Fiscal Year 2010. During this period, we have begun phasing in full data entry into WIRe and anticipate that we will be able to reflect complete data from WIRe by the next annual report.
